

Electric Watertight Sliding Door SHIPTIGHT (E)

Technical Data

- Variable door sizes acc. to customers demand
- Available for 0 – 15 m wc
- Pre-mounted, tested compact unit
- Variable sill versions
- No need for straightening the bulkhead
- Shortest possible installation time

Advantages

We've made a host of further enhancements to our proven Electric Watertight Sliding Door. All the following features on the SHIPTIGHT (E) model are new:

- Using a Y-section seal makes for optimal equalisation of mounting tolerance when welding in place
- Increased door frame stiffness
- Guide unit is made of rust-proof stainless steel and brass
- Less force needed to close the door
- Easier installation, as new model requires no electrical motor and spindle drive unit to be assembled at the bulkhead
- Sealing surface is rust-proofed
- Electrical drive system with low noise emission for comfortable operation
- New designed emergency generator for operation with low mechanical forces
