SCHOENROCK
ACCESS IN MOTION

Electric Watertight Navy Door **SHOCKTIGHT**

Technical Data

A first for SCHOENROCK Hydraulik: Following successful shock and vibration testing and certification, we are now also able to supply our watertight bulkhead door systems for naval surface ships.

- Shock tested acc. German Navy specification BV230 (fulfilling test limits acc. Stanag 4141 and MILS-901D (Navy))
- Vibration tested acc. German Navy specification BV240
- Gastight sealing concept
- Compact, space saving design due to innovative drive concept
- Variable sizes according to customer demand
- Low maintenance requirements
- Pre-mounted unit for shortest installation time
- No need for additional bulkhead straightening
